Tsunami Event
Fort Dension - 23-May-1960

Measured Tsunami
Max Wave Height: 0.32m - Avg Wave Height: 0.11m

Simulated Tsunami - T2 Scenario 401d
Max Wave Height: 0.58m - Avg Wave Height: 0.14m

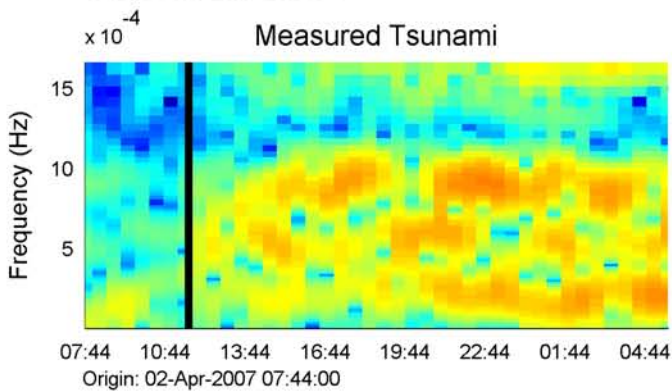

Tsunami Event Botany Bay - 02-Apr-2007

Measured Tsunami Max Wave Height: 0.05m - Avg Wave Height: 0.02m

Simulated Tsunami - T2 Scenario 172b Max Wave Height: 0.02m - Avg Wave Height: 0.01m

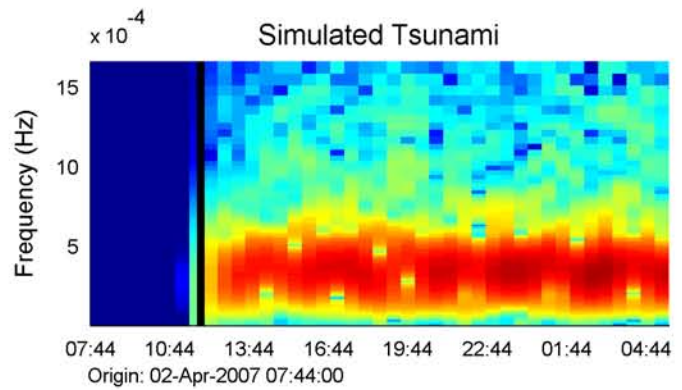

Tsunami Event
Eden - 02-Apr-2007

Measured Tsunami
Max Wave Height: 0.29m - Avg Wave Height: 0.06m

Simulated Tsunami - T2 Scenario 172b
Max Wave Height: 0.17m - Avg Wave Height: 0.10m

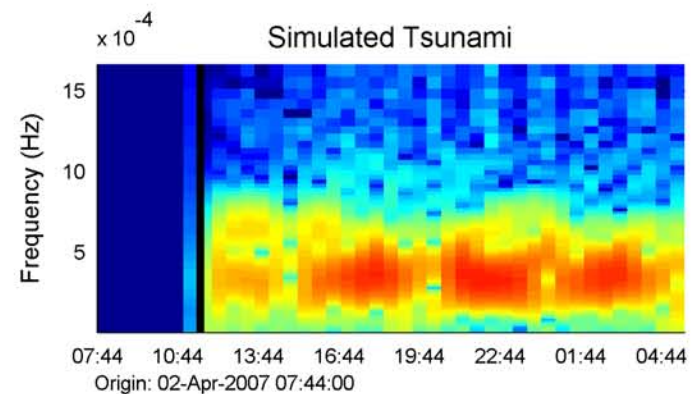

Tsunami Event Fort Dension - 02-Apr-2007

Measured Tsunami Max Wave Height: 0.09m - Avg Wave Height: 0.03m

Simulated Tsunami - T2 Scenario 172b Max Wave Height: 0.07m - Avg Wave Height: 0.03m

Tsunami Event Port Kembla Outer Harbour - 02-Apr-2007

Measured Tsunami Max Wave Height: 0.20m - Avg Wave Height: 0.05m

Simulated Tsunami - T2 Scenario 172b Max Wave Height: 0.09m - Avg Wave Height: 0.03m

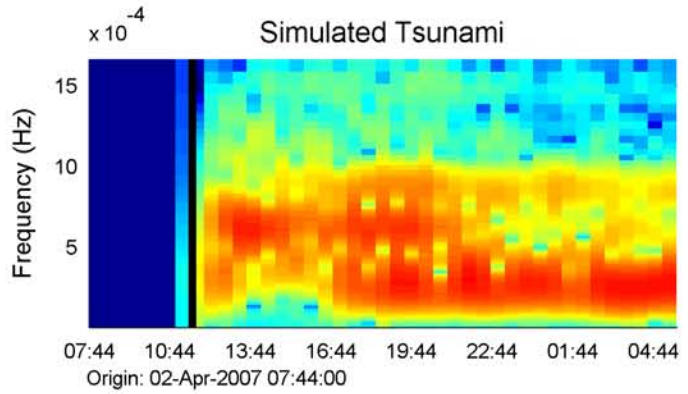

Tsunami Event
Port Kembla Inner Harbour - 02-Apr-2007

Measured Tsunami
Max Wave Height: 0.32m - Avg Wave Height: 0.11m

Simulated Tsunami - T2 Scenario 172b
Max Wave Height: 0.11m - Avg Wave Height: 0.04m

Tsunami Event Botany Bay - 15-Jul-2009

Measured Tsunami Max Wave Height: 0.06m - Avg Wave Height: 0.02m

Simulated Tsunami - T2 Scenario 218b Max Wave Height: 0.05m - Avg Wave Height: 0.01m

Tsunami Event
Eden - 15-Jul-2009

Measured Tsunami
Max Wave Height: 0.18m - Avg Wave Height: 0.05m

Simulated Tsunami - T2 Scenario 218b
Max Wave Height: 0.18m - Avg Wave Height: 0.09m

Tsunami Event
Fort Denison - 15-Jul-2009

Measured Tsunami
Max Wave Height: 0.08m - Avg Wave Height: 0.02m

Simulated Tsunami - T2 Scenario 218b
Max Wave Height: 0.11m - Avg Wave Height: 0.04m

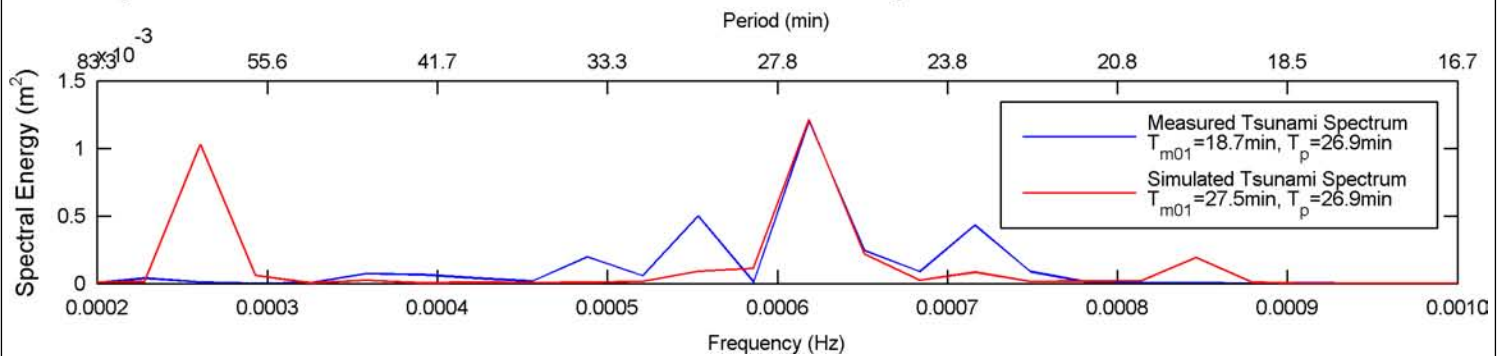

Tsunami Event
Port Kembla Outer Harbour - 15-Jul-2009

Measured Tsunami
Max Wave Height: 0.15m - Avg Wave Height: 0.06m

Simulated Tsunami - T2 Scenario 218b
Max Wave Height: 0.23m - Avg Wave Height: 0.05m

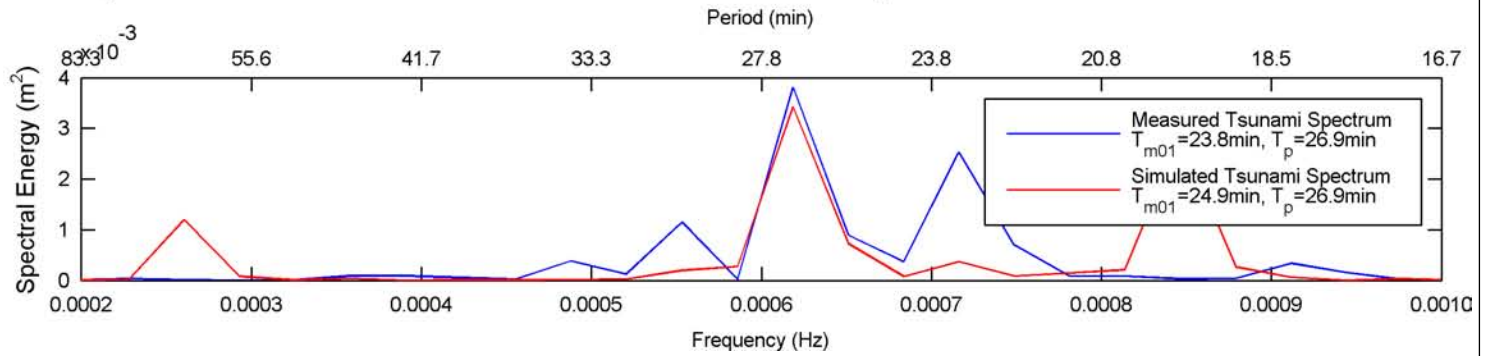

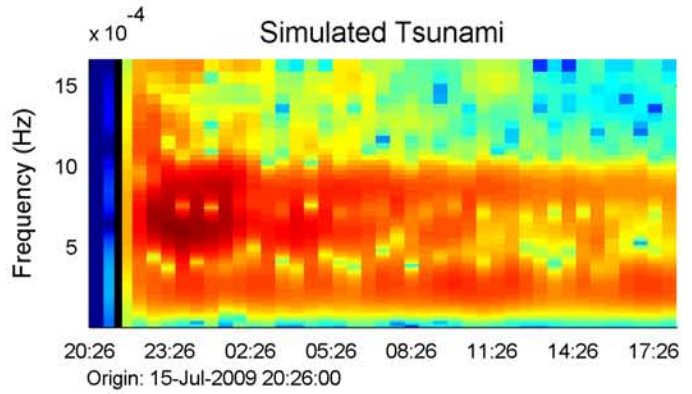

Tsunami Event
Port Kembla Inner Harbour - 15-Jul-2009

Measured Tsunami
Max Wave Height: 0.30m - Avg Wave Height: 0.10m

Simulated Tsunami - T2 Scenario 218b
Max Wave Height: 0.35m - Avg Wave Height: 0.09m

Tsunami Event Botany Bay - 28-Feb-2010

Measured Tsunami Max Wave Height: 0.08m - Avg Wave Height: 0.02m

Simulated Tsunami - T2 Scenario 408d Max Wave Height: 0.08m - Avg Wave Height: 0.02m

Tsunami Event Fort Dension - 28-Feb-2010

Measured Tsunami Max Wave Height: 0.15m - Avg Wave Height: 0.05m

Simulated Tsunami - T2 Scenario 408d Max Wave Height: 0.18m - Avg Wave Height: 0.05m

Tsunami Event Botany Bay - 12-Mar-2011

Measured Tsunami Max Wave Height: 0.13m - Avg Wave Height: 0.04m

Simulated Tsunami - T2 Scenario 310d Max Wave Height: 0.12m - Avg Wave Height: 0.05m

Tsunami Event Eden - 12-Mar-2011

Measured Tsunami Max Wave Height: 0.37m - Avg Wave Height: 0.12m

Simulated Tsunami - T2 Scenario 310d Max Wave Height: 0.45m - Avg Wave Height: 0.14m

Tsunami Event
Fort Dension - 12-Mar-2011

Measured Tsunami
Max Wave Height: 0.13m - Avg Wave Height: 0.04m

Simulated Tsunami - T2 Scenario 310d
Max Wave Height: 0.13m - Avg Wave Height: 0.05m

Tsunami Event
Port Kembla Outer Harbour - 12-Mar-2011

Measured Tsunami
Max Wave Height: 0.36m - Avg Wave Height: 0.09m

Simulated Tsunami - T2 Scenario 310d
Max Wave Height: 0.52m - Avg Wave Height: 0.20m

Tsunami Event
Port Kembla Inner Harbour - 12-Mar-2011

Measured Tsunami
Max Wave Height: 0.48m - Avg Wave Height: 0.20m

Simulated Tsunami - T2 Scenario 311d
Max Wave Height: 0.42m - Avg Wave Height: 0.14m

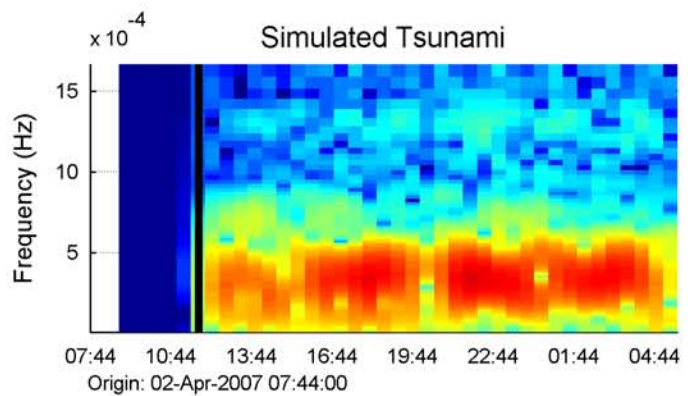

Tsunami Event
Balls Head - 02-Apr-2007

Measured Tsunami
Peak Velocity: 0.21m/s

Simulated Tsunami - T2 Scenario 172b
Peak Velocity: 0.12m/s

Tsunami Event
Port Kembla - N - 02-Apr-2007

Measured Tsunami
Peak Velocity: 0.05m/s

Simulated Tsunami - T2 Scenario 172b
Peak Velocity: 0.02m/s

Tsunami Event
Balls Head - 15-Jul-2009

Measured Tsunami
Peak Velocity: 0.09m/s

Simulated Tsunami - T2 Scenario 218b
Peak Velocity: 0.13m/s

Tsunami Event
Port Kembla - E - 15-Jul-2009

Measured Tsunami
Peak Velocity: 0.08m/s

Simulated Tsunami - T2 Scenario 218b
Peak Velocity: 0.11m/s

Tsunami Event
Port Kembla - N - 15-Jul-2009

Measured Tsunami
Peak Velocity: 0.07m/s

Simulated Tsunami - T2 Scenario 218b
Peak Velocity: 0.09m/s

Tsunami Event
Balls Head - 28-Feb-2010

Measured Tsunami
Peak Velocity: 0.43m/s

Simulated Tsunami - T2 Scenario 408b
Peak Velocity: 0.23m/s

Tsunami Event Balls Head - 12-Mar-2011

Measured Tsunami Peak Velocity: 0.18m/s

Simulated Tsunami - T2 Scenario 310d Peak Velocity: 0.28m/s

Tsunami Event
Port Kembla - E - 12-Mar-2011

Measured Tsunami
Peak Velocity: 0.21m/s

Simulated Tsunami - T2 Scenario 310d
Peak Velocity: 0.18m/s

Appendix C

Tsunami Scenario Maximum Wave Height and Run-up Results

C.1 Swansea

Tsunami Wave Height is measured as height of tsunami wave crest above still water level – see Glossary

Appendix D – Electronic Appendix
Tsunami Scenario Mapping and Time
Series Plots

MODEL OUTPUT FOR EACH SIMULATION

A standard naming convention is used for each model output presentation as follows:-

Mapping: *Site-Scenario#-Parameter-Frame.pdf*

Time Series: *Site-Scenario#-TS.pdf*

Site

- LMO = Lake Macquaire/Swansea
- MLY = Manly
- BBY = Botany Bay
- WPK = Wollongong/Port Kembla
- MBA = Merimbula

Scenario#

Scenario #	ARI (years)	Source Zone *	Water Level ^	Scenario #	ARI (years)	Source Zone *	Water Level ^
